FOR IMMEDIATE RELEASE 5/24/22

Nexicom Inc. High Speed Fibre Optic Network Continues Mass Expansion Throughout Peterborough & Northumberland Counties – Introducing Lakefield & Bridgenorth.

Nexicom announces the implementation of numerous state-of-the-art high speed fibre optic network platforms throughout the community.

Millbrook, ON: It is with great excitement Nexicom announces the continued development of their next generation, ultra-high speed fibre optic internet network throughout Peterborough and Northumberland Counties.

Nexicom recently completed new fibre networks in Lakefield and Bridgenorth, and are close to completion of their latest fibre network in their hometown of Millbrook Ontario.

Additional new networks currently under construction include Warsaw, Keene, Hiawatha, South Monaghan, Bailieboro, Bewdley, Elizabethville, Garden Hill and Campbellcroft.

While providing internet speeds up to 1 Gig, Nexicom will now be able to offer rural residents customizable digital television and telephone options never before seen. Live stream, on-line gaming, viewing Netflix, and working from home have never been easier.

“We understand that home and business owners in traditional rural communities need reliable and affordable high-speed internet now more than ever, and we are proud to be the company that answers the call” states Tina Thornton, Special Projects Manager at Nexicom.

The new 1 Gig Bridgenorth & Lakefield networks will provide a pure fibre optic network connection to over 2000 homes and 150 businesses.

From its humble rural origin as the Turner Telephone Company in the idyllic village of Millbrook in 1898, to their current role as the leading ISP in the Kawarthas, Nexicom’s mission has always been to bring next generation technology and award-winning customer service to the communities they serve. From internet and television, to telephone and security services, Nexicom has your residential and business needs covered.

Wondering if your home is located in one of Nexicom's new fibre networks? Visit their website at <https://nexicom.net/internet/fibre>, or call (705) 775-6394.
