Longest Distance On One Breath
Russian freediver Marina Kazankova dons a mermaid fin and swims 154 meters on one breath, breaking the world record.

Spring has Sprung, be sure to Call Before You Dig!

With the warm Spring weather approaching so is the avid gardener! It is very important to note that many utility lines run beneath the soil and it is vital to have their location marked before you do any major digging in the garden.

In addition, Cable TV and phone lines often run just 1 to 2 inches below the surface and can be cut even while planting small perennials. Often a Cable TV line can be sliced while edging a bed without noticing it. You may only notice that the connection has been cut when the television stops working. Cable TV is not a life-or-death matter, but if a gas line or power line were cut the consequences could be much more serious.

Fortunately, services offered by Ontario utility companies will mark the location of these lines for free. [Contact www.on1call.com](http://www.on1call.com) first to get a free locate so you can dig safely. Be aware, homeowners are liable for any damage or injury caused by interfering with any power lines, gas lines or any other buried infrastructure.

For more information or to request a locate online, visit the Ontario One Call [website](http://www.on1call.com/) at <http://www.on1call.com/> or by phone at 1-800-400-2255 or 611.

For all Nexicom customers we offer free line locates everywhere, for any of our telephone, Cable TV and fibre services. Contact us at 1-888-639-4266 or 611 to schedule a field technician.

It generally takes two working days to mark the locations of your utility lines, so allow plenty of time before beginning your digging project.

Dig carefully by hand if you are working within 12 to 18 inches on either side of the location marked for any line. The deeper you dig, the greater the chance you will encounter a line, so the more careful you will need to be.
