I like to use Pinterest to look for home decorating and craft ideas, but sometimes it can be overwhelming to navigate the platform. I've found that using Guided Search is especially valuable as a visual search engine for inspiration.

When you click a Guide, you'll automatically add it to your original search query. Then a fresh set of Guides will appear under the search bar, and you can continue selecting until you've found all the inspiration you're looking for. You can also use the "Guides" list to filter your search by category, so you can narrow your focus to specific types of ideas. It's a great way to discover new ideas and find just the right inspiration for your projects.

So, if you're looking for a way to search more efficiently on Pinterest, try using Guided Search! It's a simple but effective way to find the ideas you want, without having to sift through pages and pages of search results.
